ORGANISATIONAL BACKGROUND

Citizens' Climate Lobby Mauritius is under the umbrella of Halley Movement Coalition.

Halley Movement is a coalition of charitable organisations working for the welfare of citizens in Mauritius and in the Southern African region. The Non-Governmental Organisation is in consultative status with the UN Economic and Social Council (ECOSOC).

Halley Movement works in partnership with the private sectors governmental institutions and other international and national organisations. Halley Movement now sits on board of various international organisations in an attempt to devise policies in the interest of the world children.

Citizens' Climate Lobby Mauritius was founded in 2021 and has the experience to work the profound difference people can make by empowering and inspiring our elected representatives, local media and community.

ABOUT US

Citizens' Climate Lobby Mauritius is a non-profit, non-partisan, grassroots advocacy climate change organization focused on national policies to address climate change in Southern African Countries and Indian Ocean Islands.

Our consistently respectful, non-partisan approach to climate education is designed to create a broad, sustainable foundation for climate action across Southern African regions and Indian Ocean Islands. By building upon shared values rather than partisan divides, and empowering our supporters to work in keeping with the concerns of their local communities, we work towards the adoption of fair, effective and sustainable climate change solutions in the specified regions.

In order to generate the political will necessary for passage of the Energy Innovation and Carbon Dividend Act, along with Halley Movement's research team, we train and support local volunteers to build relationships with elected officials, the media and our local community

ABOUT OUR PROJECT

Citizens' Climate Lobby Mauritius, we explore ways to educate the population of Southern African Countries and Indian Ocean Islands on how to tackle the illicit actions against the environment and how to make a better environment for tomorrow.

OUR MISSION

- We are focused on what we see as the single most impactful solution to climate change – a national carbon fee and dividend. After the research works, we can be effective and after accomplishing our goal, we will tackle the next most impactful solution.
-

OVERVIEW

As Mauritius is prone to environmental issues such as climate change coastal erosion and water management, loss of biodiversity, soil degradation, invasion species, marine pollution, waste management, sustainable land use. There, CCL Mauritius, we empower the population of Mauritius to work together to make a better environment for us and the future generation.

Our progress is to build people's minds about the importance of greening the environment.

The following were address to the citizens by CCL Mauritius:

·Transformative Energy in Sub-Saharan Africa and Indian Ocean Island:

- Impact of COVID-19 pandemic on global scale
- Ground-breaking actions that lead to the improvement in the environment
- COP 26 vs COP 27 measures for Southern African Countries and Indian Ocean Islands
- Technological advancement in Climate improvement

STRATEGY

The main strategy for CCL Mauritius is in three tears as outlined below:

- 1.Research: To understand and analyse the facts concerning Climate in Southern African Countries and Indian Ocean Islands
- 2.Awareness: Communicate findings to educate the public as well as engage with key stakeholders to take these research outcomes into consideration in policy making
- 3.Change: Advocate for better climate reform that will benefit Southern African Countries and Indian Ocean Islands

"Try to leave the Earth a better place than when you arrived"
